LOCKOUT

LOCKDOWN

EVACUATE

SHELTER

Mrs. Becker has been spending the last two weeks going over it will all elementary students and will be sharing with the HS students starting next week. SRP brings up lots and questions as well as scenarios. Mrs. Becker as well as teachers are glad to answer questions from students, parents can reach out to Mrs. Becker or Mr. Mezger.

THE STANDARD RESPONSE PROTOCOL

A critical ingredient in the safe school recipe is the uniform classroom response to any incident. Weather events, fires, accidents, intruders and other threats to student safety are scenarios that are planned and trained for by school and district administration and staff. Historically, schools have taken this scenario-based approach to respond to hazards and threats. It's not uncommon to find a stapled sheaf of papers or even a tabbed binder in a teacher's desk that describes a variety of things that might happen and the specific response to each event.

SRP IS ACTION BASED

The Standard Response Protocol (SRP) is based not on individual scenarios but on the response to any given situation. Like the Incident Command System (ICS), SRP demands a specific vocabulary but also allows for great flexibility. The premise is simple - there are four specific actions that can be performed during an incident. When communicating these, the action is labeled with a "Term of Art" and is then followed by a "Directive." Execution of the action is performed by active participants, including students, staff, teachers and first responders.

- Lockout is followed by the Directive: "Secure the Perimeter" and is the protocol used to safeguard students and staff within the building.
- Lockdown is followed by "Locks, Lights, Out of Sight" and is the protocol used to secure individual rooms and keep students quiet and in place.
- Evacuate is always followed by a location, and is used to move students and staff from one location to a different location in or out of the building.
- Shelter is always followed by a type and a method and is the protocol for group and self protection.

These specific actions can act as both a verb and a noun. If the action is Lockdown, it would be announced on public address as "Lockdown! Locks, Lights, Out of Sight." Communication to local Law Enforcement Agency would then be "We are under Lockdown." Each response has specific student and staff action. The Evacuate response is always followed by a location: "Evacuate to the Bus Zone." Responses can also be combined: "Evacuate to Hallway; Shelter for Tornado; Drop, Cover and Hold."

BENEFITS

The benefits of SRP become quickly apparent. By standardizing the vocabulary, all stakeholders can understand the response and status of the event. For students, this provides continuity of expectations and actions throughout their educational career. For teachers, this becomes a simpler process to train and drill. For first responders, the common vocabulary and protocols establish a greater predictability that persists through the duration of an incident. Parents can easily understand the practices and can reinforce the protocol. Additionally, this protocol enables rapid response determination when an unforeseen event occurs.
